# About Us

Founded in 2005, CR Farm Products began its journey as exporters based on our great experience as root and tuber farmers.

With an established family business of four brothers and their father, our dedication and hard work enabled us to take the next steps as exporters by finding new markets for our crops. Thus, we began exporting ginger and pumpkin to the USA. As a family owned and operated business, we offer a more extensive line of fresh products from the most desirable climates in Costa Rica.

CR Farm Products has now evolved into one of the leading companies in the production and exportation of agricultural products from Costa Rica.
